

Artist's Logbook

Artist Name or Organisation: **Growtheatre**

Art-form: **Outdoor Theatre**

Activity Name: **Transforming Outdoor Spaces into Performance Spaces**

Instructions

You will need:

Ball of string

Scissors

Natural resources – to be found where you are creating e.g. moss, stones, leaves, sticks, flowers, seeds etc.

Set Design is all about creating a world for a performance.

We love doing this outside and hope you will be inspired to want to transform outdoor spaces into Performance Spaces too!

Here are 2 ideas; can you think of more?

LASER MAZE

These high-tech laser mazes are the ultimate challenge! Are you bendy enough to avoid setting the lasers off?!

1. The best place to make a Spy Laser Maze is in an area where there are lots of trees to wrap the string around.
2. If you are stuck indoors, never mind! Use masking tape to secure the string in a narrow space, like a hallway, to create your maze.

3. Can you create a splendid and sneaky Secret

Pirate Map

You cannot be a member of the pirate crew unless you can make a good treasure map!

1. In a garden, park, green space or wood, can you design a treasure map using natural materials?
2. Can you make your treasure map 3D?
3. Don't forget to mark the treasure is with an X

4. Can create a performance about a dastardly pirate captain – the owner of the treasure map?
5. Could you transform the Treasure Map into a Treasure Island and make some small, pirate puppets, whittled from sticks, and create a puppet show?
